1 Introduction

An impact report is a way for organizations to communicate the issues they are trying to improve, as well as their strategy on how they facilitated change. It measures the impact that NFPs make in people's lives, focusing on their social or environmental outcomes. It isn't merely a description of the activities undertaken by the organization either, but it also provides the analysis on the results of these activities.

here are several reasons why organizations create impact reports, such as:

- Being able to review your projects against your mission and goals
- Improving and implementing changes depending on the results of the report
- Building trust with funders, supporters, and beneficiaries
- Cultivating a culture of learning among similar organizations
- Celebrating the achievements of staff and volunteers
